As advertised in EduAdvisor

Welcome Message From Our Founder

Welcome to Nobel International School,

The essence of education is learning to become the person I want to be when all assessments and exams are finally laid to rest! The pursuit of what measures success continues to rapidly change especially during times of unprecedented global uncertainties. Here at Nobel, we take our students with us to ride courageously above the unsettling winds of change. Teachers are trained to intentionally create learning and nurturing opportunities that empower students to grow emotionally, academically and socially as they prepare for adult life.

Nobel invests in deeper levels of providing vigorous support in well-being, mental health, open dialogue and ongoing student counseling. Moreover, our students serve in collaborative community outreach despite many obstacles. The compassion to reach out to others by our students I find meaningful and rewarding, and is an especially integral component in our students' education. We delve into technology more deeply, teacher development more robustly and learning outcomes more closely to determine the best way forward in navigating the new realities. We want our students' education to be relevant when they embark on careers years from now.

I appreciate the opportunity to introduce you to Nobel International School and invite you to visit our campus where you will observe the warm vibrancy of an active learning community. We do not just impart quality academics to our students; we groom them to become lifelong learners, effective communicators, compassionate citizens, and leaders with integrity.

"Train up a child in the way he should go, and when he is old, he will not depart from it."

Claudine Chua

Why Nobel?

Experience teaching by knowledgeable and qualified academicians

Engage students to actively use technology in the scholarship of teaching and learning

Heighten chances of application to top universities through leadership and community outreach programmes

Prepare students for University Learning Experience with the comfort and guidance of pre-university environment

Promote student equity in the fields of academic, sports and character development

Reward academic excellence with variety of scholarship plans and financial discounts

The Pathway To Global Universities

Subjects Offered

MATHEMATICS	FURTHER MATHEMATICS	PHYSICS	CHEMISTRY
BIOLOGY	PSYCHOLOGY	ACCOUNTING	BUSINESS

Zulkarnain bin Hairolkasmi

Physics

BSc Mechanical Engineering (JPA Scholar)
University of Malaya, Malaysia

Cambridge Physics
(Stella Maris) - 3 Years
Cambridge Physics
(WMS, Bandar Sri Coalfields) - 1 Years

Simon Ho Chon Wai

Information & Communication Techonology (ICT)

BSc Computer Science
Universiti Kebangsaan Malaysia (UKM), Malaysia
Diploma in Education majoring in Mathematics
Universiti Utara Malaysia (UUM), Malaysia

Cambridge ICT & Computer Science
(Nobel International School) - 5 Years

Compassion To Reach Out To Others

Community Service Hours

As a dual-purpose institution, Nobel International School also focuses on compassion outreach programmes to expose our students to the less-priviledged and marginalized communities by participating at soup kitchens, food distribution centres, and more. Our students will graduate with both globally recognized A Level certification and sufficient community service experience that provides an exponential leverage when applying for higher educatvion.
